HEMP OIL

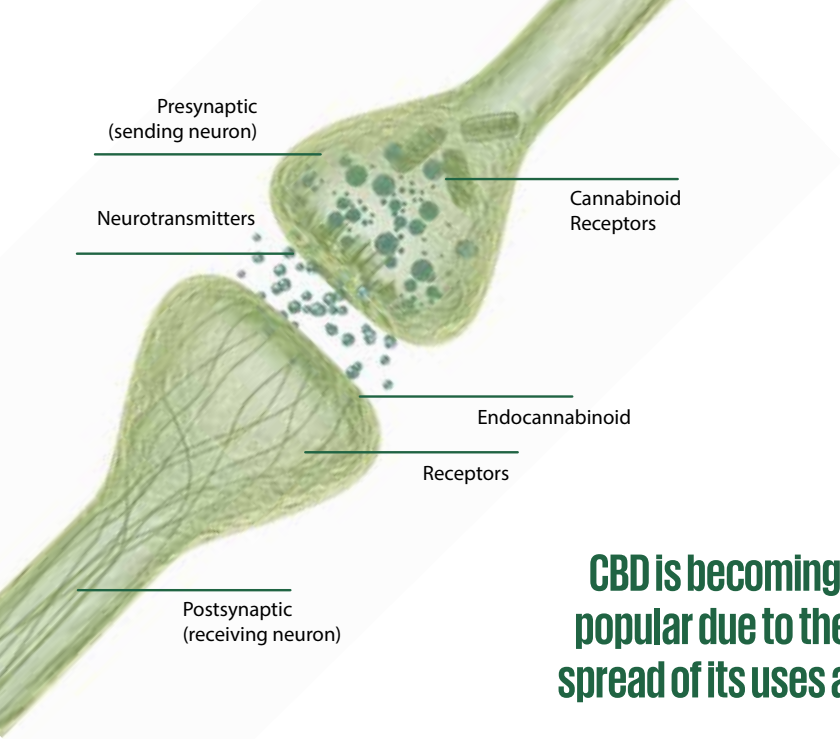

A GUIDE TO CBD

Official Distributor of Endoca products in South Africa.

CBD is becoming increasingly popular due to the information spread of its uses and qualities.

How CBD is used by the body

The Endocannabinoid System (ECS) is our body's own complex cell-signaling system that plays a role in regulating a vast range of functions and processes in our bodies (regulating things such as inflammation, stress, muscle formation and pain). This system is active in your body even if you do not use any cannabis products.

These functions are all essential to creating homeostasis or balance in the body, in other words, the ECS system works to return your body to its ideal operation in reaction to interference.

Unfortunately, through the stresses and strains of modern living, the Endocannabinoid System can itself become depleted, meaning it cannot effectively carry out its role of bringing balance to the body.

Research suggests that supplementing with CBD can help keep this system functioning optimally.

Hemp Oil Capsules with CBD BEST FOR PRECISE DOSING

Capsules are ideal for precise dosing of CBD. Our tasteless and odorless capsules are vegan, gluten-free and completely kosher.

Hemp Oil Drops with CBD SIMPLE AND EFFECTIVE

CBD Oil Drops are an easy way to administer and consume CBD. The absorption rates are much higher when hemp oil is taken in liquid form. Our CBD is diluted in organic hemp seed oil, rich in Omega 3 and 6.

How much hemp oil with CBD should I take?

The effects of CBD will vary from person to person, so there are no hard and fast rules for dosing CBD, apart from taking it on an empty stomach for maximum absorption. We always suggest to start slowly and gradually increase your dosage as you learn how your body responds.

Why choose Endoca CBD Hemp Oil?

Endoca prioritizes the safety and quality of our products to ensure the best and most consistent output for our end users. We cultivate our own plants and are responsible for the whole supply chain - from seed to shelf. Every hemp variety is different and contains over 400 naturally occurring molecules in varying amounts. We do not remove any of these active molecules from our oils, meaning it can be referred to as a "Full Spectrum Oil".

The quality of Endoca Hemp Oil with CBD is guaranteed through a rigorous focus on a solely organic cultivation of hemp, which is always third party lab tested and comes with verified batch reports. We share our batch reports online, so that our clients always feel safe using and recommending our products.

Endoca's customer service team offers 24/7 support for questions or concerns.

Pure CBD Crystals

Made from a CBD-rich strain of Cannabis Sativa and at 99% purity, this CBD isolates contain 0% THC but still include the terpenes Myrcene, Limonene, Alpha & Beta-pinene, Linalool, B-caryophyllene, Caryophyllene oxide, Terpinolene and Humulene.

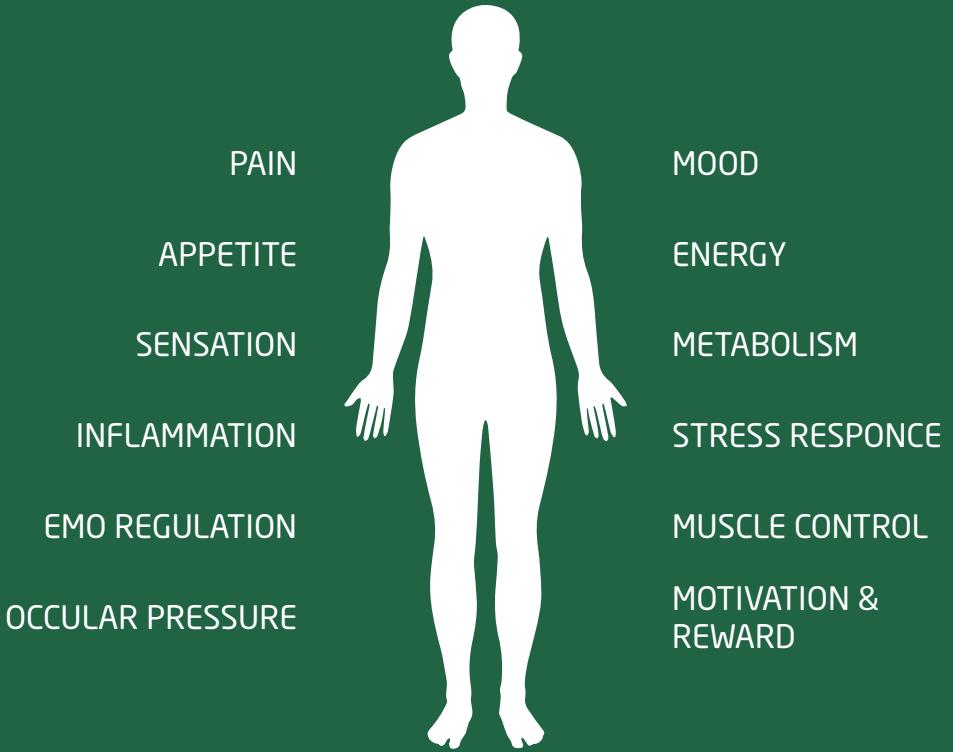

How to use CBD crystals?

Vaping: Use an E-cigarette or vaporizer for instantaneous results

Dabbing: Recommended for advanced users and requires a concentrate pipe

Baking edibles: Melt with butter and then add to your baking.

Mix with carrier oil: Custom make your own CBD oil using a pure carrier oil of your choice.

The Magic of CBD

The benefits of CBD can appear very broad and difficult to identify due to every user having a unique experience and response. While some will report assistance with anxiety or mood, others may find it aids in muscle recovery. These varying reports are due to the broad functioning of the Endocannabinoid System and the intake of CBD assisting the system in returning out-of-balance functioning to its optimal state.

pure Green for life

Official Distributor of Endoca products in South Africa.

Why choose Endoca CBD Hemp Oil?
